Water Conservation Facilities in the Institution

During DVV only Bore well/ Open well recharge was considered by the DVV partner. As per availability, the college has claimed (i) Rain water harvesting and (ii) Bore well/ open well recharge as water conservation facility. Being a government institution, Institutional building has been constructed by the PWD (Public Works Department) and from the very beginning both Rain water harvesting as well as Bore well/ Open well recharge facilities have been provided by Government agency (PWD). Therefore, the concerned bills, vouchers etc. are not available in the institution. Geotagged photographs of these are attached here with in support of claim.
